Enter the **position number** or Search for it.

Query date: Use the **correct** query date. Make sure that the **current date** is in the **Query Date**. This will show a **complete history** of employees who have occupied a **position number**. In this example, the past and current employees are shown. If your **query date** is **before** the date the **latest employee was hired**, the information **will not display**. For instance, if Joe was hired on October 1, and the query date was September 30, Joe's name would not be listed.
